School Testimonials

Franklin McKinley School District

“We started with three schools being involved, then went to four schools, this year we added a fifth school. We have found this city-coordinated service to be essential in making our schools safe. I have experienced only positive results working with their staff, as have the school principals, teachers and parents. This has been one of the most positive collaboratives I have been involved in.” - **Robert Dunwoody, Director of Welfare and Attendance**

Mt. Pleasant Elementary School District

“Having the Safe School Campus Initiative has been a wonderful resource for our school and community. The support of its members, like Kevin Hirabayashi and others, has helped us solve many problems and prevent many others from occurring. It is very comforting knowing that we have a resource to turn to in case a problem grows beyond the control and scope of school. The Safe School Campus Initiative has also been a valuable resource for educating parents through forums and individual contacts on how to deal with community and adolescent issues. It is our sincerest hope that we may retain these services for years to come!” - **Norm Robbins, Assistant Principal August Boeger Junior High School**

“The Safe School Campus Initiative program has been very useful in our District. The SSCI staff has been extremely responsive to our needs and has assisted with arranging training for parents, students and staff. They have been quick to provide support when requested and have helped facilitate communication between our school, law enforcement and social services. Their support with our Code Red training and school drill implementation in particular has been invaluable. We continue to learn new ways to utilize this valuable resource in keeping our schools and community safe and informed. I think the program has indeed helped make our schools safer, because the program is dedicated to facilitating communication and supporting the collaboration between agencies, communication has improved, training for staff, parents and students has taken place in a more timely manner, problems are resolved quickly and effectively and information has been distributed to help us keep our students safe immediately. Recently in instances of crimes in our area, it was the SSCI program staff that informed us, allowing us to warn students and parents, and in one instance, actually keep students on campus while an incident was resolved in the neighborhood. I think all of this, as well as the assistance and support with Crisis preparation have also increased our school staff and students feelings of safety and collaboration.” - **Laurie Clarke, Director of Pupil Services**

San José Unified School District

“My experiences working with the students of Broadway High School and Crossroads Community Day Schools in the school years of 1999 - 2002 in San Jose Unified were indeed most rewarding. I was able to do my job and be of guidance to the students and the parents thanks to the excellent support from Ed Solis and the members of the Right Connection. Ed Solis and the members of the Right Connection are professional and eager to assist with services. Ed and the team provide excellent guidance, support, classes and safety measures to our students in our school campuses and our community. My position now, as Administrator of Parent Education & Involvement gives me the opportunity to call on Ed Solis and the many services

available to best assist our parents and therefore our students. My sincere thanks to Ed Solis and the members of the Right Connection for their dedication and assistance.” -**M. Elizabeth Bliss**
Administrator Parent Liaison

Campbell Union High School District

“The Safe School Campus Initiative team has been an integral part of the Campbell Union School District for the past several years. Member of SSCI meet regularly with our middle school administrators to discuss a variety of topics including school safety, student support and intervention services, and agency collaboration.

At the request of the District, the SSCI expanded its team to include the Campbell Police Department and Sheriff’s office in all SSCI meetings and communications. These collaborative efforts assisted the District and agencies in developing a revised Comprehensive Safety Plan for the district and schools, which included emergency protocols to be followed by all district, site and emergency response personnel. In addition, with the support of the SSCI team, Campbell Union School District expanded Code Red training and protocols for all district personnel.

As an aside, I must mention that it was because of SSCI team leadership that the District participated in training in the event of a bio-terrorist attack. Naturally, all SSCI personnel and their reporting districts were in attendance at the training. We were recently contacted by agencies outside the District regarding our inclusion of protocols in our plan. We provided them with our model, and credited the SSCI team for their leadership in helping us to develop those protocols.

The measure of success for SSCI, however, is the day-to-day support they provide to all 12 of our high school sites in helping to assure safe and secure school campuses. SSCI members provide emergency response, agency collaboration, and community support. At one of our schools, an area gang had tried to use the site as a meeting place. We placed a call to Aurelia Bailey who had police, city, and SSCI team members at the site within a matter of a few hours. Through their involvement, we were able to not only secure the facility, but to provide the neighborhood with increased police presence. In addition, the team worked to set-up a Community meeting to discuss ways to keep the neighborhoods safe. Parents, school personnel, and the community felt very supported by the team’s efforts. As a result, the school is no longer a meeting place and the surrounding community is a safer place to be. Campbell Union School District enthusiastically supports the Safe School Campus Initiative.” – **Shelby Spain, Director of Student Services**
